

Knowledge you can **talk to**, a human you can still **book**.

marnji turns anyone's real knowledge into a **brain they own** — grounded in their materials, speaking in their voice. Talk to it free. Book the human behind it. Connect it anywhere.

• Connect

THE BACK STORY

- People carry immense **knowledge, skill, experience and hard-won expertise**.
- Some monetise it every day, through the work they do.
- Most never do — they give it away, or never share it at all.

But what if...

there was a simple way for anyone to turn what they know into something they **own** — and can be paid for.

And the same place could quickly match someone with a problem to the person who has actually solved it.

Now there is. It's called marnji.

We were promised AI would answer everything. It can. And that's the problem.

- AI can source the knowledge. It can't hand you judgment — or the lived experience that turns it into a decision.
- However capable it becomes, AI is a digital entity — it will never have **its own experience** of what it's telling you.
- The question isn't AI **or** people. It's a platform built for **both**.

“

AI can tell you what happens in life. It will never tell you what it's like to live it.

“

Access to knowledge has never been greater. Lived experience is what turns it into insight instead of noise.

SEE IT WORKING — ASK ONCE, HEAR FROM MANY MINDS

The screenshot shows the marnji platform interface. At the top, a search bar contains the text "marnji · one question, many minds". Below this, the marnji logo is visible with the tagline "to know". A question is posed: "How do I improve my sales skills?". Below the question, a row of expert avatars is shown: Mehdi, Peter, Carson, Danny, Lauren, and Chris. A detailed answer from Mehdi Qerim is highlighted. Mehdi is identified as a "Senior Management & Leadership Business..." and is marked as a "Strong match". His answer begins with "Mehdi brings a relationship-led business development lens grounded in commercial outcomes." and continues with advice on improving sales skills by focusing on relationships before transactions. The interface also shows partial answers from other experts on the right side.

Every expert answers from their own materials, in their own voice — then you go deeper with whichever one fits.

WHEN AI ISN'T ENOUGH — BOOK THE HUMAN
